reference/similar examples

<https://getrecepthero.com/> - capturing digital receipts in Finland

<https://docs.recepthero.io/>

<https://app.tryflux.com/> - capturing digital receipts in UK

<https://developers.tryflux.com/>

Steps to start

- Think what else documentation/fields would be needed for the receipt project
- Write update current documentation (best case create a backlog of tasks)
- Hire a developer
- Setup all accounts with Chexr email address (to keep the possession of them) and grant access for developer
- Create bank APIs and test them out
- Write elaborate documentation and give it for peer review (to have second opinion)
